Hello

My name is Saprunova Kateryna. I have been experiencing design from different perspectives more than 12 years. Graduated as a software designer I realized that visual part is even more important for me than technical. Therefore I learned graphic design. Finally, I combined both specialties in the work of web designer. It is a big pleasure to see how things around could be connected and matched in the composition. For me, it's a great sign of a good design.

Soft skills

Self-discipline and responsibility, inquisitiveness and observation, empathy and benevolence.

Qualification

UX research and design **Front-End Development** **Graphic and UI Design**
